Abstract : The aim of this research is the evaluation of existing human resources in gymnastics to analyze SWOT and to present a comprehensive program for human resources. The sample was 120 genuine gymnasts in 30 provinces. The results showed that the proportion of gymnasts to the total population is 13 in every 100 thousand. 97.95% were amateurs and 2.05% professionals. The proportion of Iranian gymnasts to the country population for one coach is 47 and for one referee 114. The collected information shows the situation of gymnastic of country in the axis in weakness region. By the evaluation of resources and internal external information, we can present a collection of approaches and programs.

Key Words:
Gymnastics, Strategy, Human Resources Development.
